

Curriculum Corner

Early Childhood

Welcome back to School! This past month we learned our school and classroom. We are learning to take care of our own school supplies, folders and backpacks. We practiced the flip trick when putting on our jackets. We are working on identifying our first names, shapes, colors, numbers 1-10 and some letters. We discovered how apples grow, and did many art projects. We read: Apple Trouble, Apple Tree, How Apples Grow, 10 Apples and many more. We learned about what to do in a fire, and what equipment firefighters use. We played outside with the bubble markers and obstacle courses.

Kindergarten

Kindergartners are learning about the seasons changing and using their 5 senses to explore the Fall, Apples and Why Leaves Change Colors. They are learning about their letters and sounds as well as shapes and numbers. Lots of Fall Fun in Kindergarten!!!

1st Grade

First graders have been learning about community helpers. They were excited to create their own community helpers and share their writing with their class.

2nd Grade

Second graders have chosen our classroom mascots to show community and citizenship. They have been working hard on their addition and subtraction strategies to prepare us for our upcoming place value unit. We have started our rainforest unit as our first science biome.
