

*3rd Grade*

It's hard to believe that we are almost done with the 2nd quarter! Third graders have been learning all about division. They've been connecting multiplication and division, and are working on their math facts for both of these operations. They've also been learning about nonfiction text features, and created All About Me presentations with text features! In social studies, they learned all about the fascinating history of Elgin, and just started the science unit about weather and climate.

*4th Grade*

We are doing big things in fourth grade! In math, we have gotten into long division and will be moving into multi-step word problems involving all four operations. Please make sure your child is practicing their math facts! For ELA, we have been working through informational texts - focusing on nonfiction text structures. We will move into firsthand and secondhand accounts. In regards to writing, we are building on grammar basics and getting into informational, multi paragraph, essays. In social studies, we are moving through our unit on Illinois.

*5th Grade*

5th grade has been learning so much in math! We are almost finished with our decimal unit! So far we have learned to round, compare, add, subtract, multiply, and divide decimals! So many new concepts and the students are doing an amazing job! In science we are finishing up our unit on space systems, and have started learning about the events that led to the Revolutionary War in social studies.
